

LANCIA COLOUR REFERENCE TABLE – Collated by Paul Mayo Jan-Feb 2015

NOTE: I did this for my own purposes to try to get an idea of what colours the names referred to, together with the period they were used. The representation of the colours from various sources is of course very variable & not reliable for a final decision. But it has been useful to me as a start. The table includes both historical & current information. It is a work in progress

The information covers the post-war period to about 1975.

Sources of information are various but include the researches on Geoff Goldberg's blog [Date information from Lechler published Ruoteclassiche magazine 1990, via Carter Hendricks & Geoff Goldberg's blog <http://blog.lanciainfo.com>.] & on the Lancia Motor Club Forum [<http://www.lancia.myzen.co.uk/forum/index.php?topic=4708.90>].

A Max Meyer colour swatch in private hands in the UK, is the one illustrated on Geoff Goldberg's blog:

This Max Meyer swatch (probably from the late 1960s or early 1970s) is marked: "Tinte Lancia - Per le note ragioni tecniche, le tinte di campionario sono soggette ad alterazione ed hanno, quindi solo valore indicative. 8117157 – Cantarella. 167 – Smalti per la Carrozzeria – ACRITIT A/80 serie ACRILICA – maxoloid EXTRA SERIE NITROACRILICA – COLORIFICIO ITALIANO MAX MEYER"

I have scanned every colour in this swatch & the following table includes the scan plus the descriptive information on the reverse side.

What is very interesting is that for the Lancia colours on the new classic car colour information (2015) on the Glasurit website <http://www.glasurit.com/uk/node/1744>, the last 3 numbers in their codes are the same as the old ones on the above Max Meyer swatch in most cases!

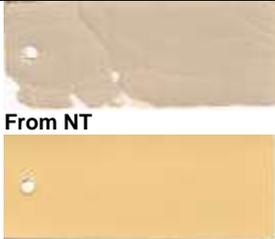

I've also taken information from the Lechler 2013 Refinish Catalogue 2013, pages 244-246

Various Lancia colour cards have been or are to be included.
